<b>Course description</b> .....	<b>xvii</b>
<b>Unit 1. IBM FileNet Business Process Manager Introduction</b> .....	<b>1-1</b>
Unit lessons .....	1-2
Lesson 1.1. Workflow fundamentals .....	1-3
Workflow fundamentals .....	1-4
Activities that you need to complete .....	1-5
Process automation with IBM FileNet BPM .....	1-6
Workflows and workflow definitions .....	1-7
Process Designer .....	1-9
Workflow maps .....	1-11
Step and workflow properties .....	1-13
Work items .....	1-15
Queues .....	1-17
Workflow rosters .....	1-19
Workflow history and statistics .....	1-21
Demonstrations .....	1-23
Activities .....	1-25
Lesson 1.2. Workflow processing .....	1-27
Workflow processing .....	1-28
Activities that you need to complete .....	1-29
Workflow processing .....	1-30
How workflows are launched .....	1-31
Inboxes, work queues, and step processors .....	1-33
Process tracking .....	1-35
Search for work in Process Administrator .....	1-36
Search targets .....	1-38
Milestones, deadlines, and timers .....	1-39
Process connectivity features .....	1-40
Activities .....	1-41
Lesson 1.3. IBM FileNet BPM architecture .....	1-43
IBM FileNet BPM architecture .....	1-44
Activities that you need to complete .....	1-45
Principal components of IBM FileNet BPM .....	1-46
Other FileNet BPM software components .....	1-47
Process Service on the Process Engine .....	1-48
Workflow database .....	1-50
Component Integrator .....	1-51
Process Task Manager (PTM) .....	1-53
BPM tools (Java applets) .....	1-55
Process Engine farming .....	1-56
Process Engine multitenancy .....	1-58

Architecture overview of IBM FileNet BPM .....	1-60
Activities .....	1-62
<b>Unit 2. Process Engine Java API Overview .....</b>	<b>2-1</b>
Unit lessons .....	2-2
Lesson 2.1. Process Engine Java API concepts .....	2-3
Lesson: Process Engine Java API concepts .....	2-4
Activities that you need to complete .....	2-5
Process API package .....	2-6
Process API naming conventions - objects .....	2-7
Process API naming conventions - methods .....	2-8
Primary API classes .....	2-10
Process development environment and samples .....	2-12
Required Java Archive (JAR) files .....	2-13
Configuring the Java runtime environment .....	2-14
Activities .....	2-16
Lesson 2.2. Process Engine objects .....	2-17
Lesson: Process Engine objects .....	2-18
Activities that you need to complete .....	2-19
Runtime objects .....	2-20
Database objects - typical isolated region .....	2-21
Work elements .....	2-23
Work object access .....	2-24
Work element access .....	2-25
Work class objects .....	2-27
Administration and configuration objects .....	2-29
Security objects .....	2-30
Workflow definition objects .....	2-31
Using Eclipse IDE for writing your code .....	2-32
Demonstrations .....	2-33
Activities .....	2-34
<b>Unit 3. Log On to the Process Engine .....</b>	<b>3-1</b>
Unit lessons .....	3-2
Lesson 3.1. Create a Process Engine session .....	3-3
Lesson: Create a Process Engine session .....	3-4
Activities that you need to complete .....	3-5
Connection points .....	3-6
Connection point function and usage .....	3-7
Setting the Content Engine URI .....	3-9
System dependency for the Process Engine .....	3-10
Authenticating the PE Java API client using CE .....	3-11
VWSession object .....	3-13
VWSession constructor options .....	3-14
Steps to log on to and log off from the Process Engine .....	3-15
VWSession constructor .....	3-16
vwSession.logon(...) .....	3-17
vwSession.logoff() .....	3-18

Sample code to log on to and log off from PE .....	3-19
Sample code to log on to the Process Engine (JSP) .....	3-20
Demonstrations .....	3-21
Activities .....	3-22
Lesson 3.2. Handle exceptions .....	3-23
Lesson: Handle exceptions .....	3-24
Activities that you need to complete .....	3-25
VWException object .....	3-26
Steps to handle a VWException .....	3-28
vwException.getKey() .....	3-29
vwException.getCauseClassName() .....	3-30
vwException.getCauseDescription() .....	3-31
vwException.getMessage() .....	3-32
Sample code to handle an exception .....	3-33
Demonstrations .....	3-34
Activities .....	3-35
Lesson 3.3. Retrieve user and group information .....	3-37
Lesson: Retrieve user and group information .....	3-38
Activities that you need to complete .....	3-39
Steps to get current user information .....	3-40
vwSession.fetchCurrentUserInfo() .....	3-41
vwUserInfo.getName() .....	3-42
vwUserInfo.getEmailAddress() .....	3-43
vwUserInfo.getProxyUserName() .....	3-44
Sample code to get current user information .....	3-45
Steps to get the LDAP users and groups .....	3-46
vwSession.findUsers(...) .....	3-47
vwSession.convertUserNameToId(...) .....	3-49
vwSession.findGroups(...) .....	3-50
Sample code to get the current Process Engine user .....	3-51
Sample code to get the Process Engine users .....	3-52
Sample code to get the Process Engine groups .....	3-53
Demonstrations .....	3-54
Activities .....	3-55
<b>Unit 4. Create Work .....</b>	<b>4-1</b>
Unit lessons .....	4-2
Lesson 4.1. Retrieve and launch a workflow .....	4-3
Lesson: Retrieve and launch a workflow .....	4-4
Activities that you need to complete .....	4-5
Steps to retrieve and launch a workflow .....	4-6
vwSession.fetchWorkClassNames(...) .....	4-7
vwSession.createWorkflow(...) .....	4-8
vwStepElement.doDispatch() .....	4-9
Sample code to retrieve and launch a workflow .....	4-10
Demonstrations .....	4-11
Activities .....	4-12
Lesson 4.2. Retrieve parameter values for a step element .....	4-13

Lesson: Retrieve parameter values for a step element	4-14
Activities that you need to complete	4-15
Steps to retrieve parameters values	4-16
vwStepElement.getParameters(...)	4-17
vwStepElement.getStepName()	4-19
vwParameter.getFieldType()	4-20
vwParameter.getMode()	4-21
VWFieldType.getLocalizedString(...)	4-22
VWModeType.getLocalizedString()	4-23
vwParameter.getStringValue()	4-24
vwStepElement.getStepResponses()	4-25
Sample code to retrieve step element fields	4-26
Sample code to retrieve parameter values	4-27
Demonstrations	4-28
Activities	4-29
Lesson 4.3. Set parameter values for a step element	4-31
Lesson: Set parameter values for a step element	4-32
Activities that you need to complete	4-33
VWParticipant class	4-34
VWAttachment class	4-35
Steps to set parameters values	4-36
Steps to set VWParticipant value	4-37
Steps to set VWAttachment value (1)	4-38
Steps to set VWAttachment value (2)	4-39
vwParameter.isArray()	4-40
vwStepElement.setParameterValue(...)	4-41
vwParticipant.setParticipantName(...)	4-42
vwStepElement.setSelectedResponse(...)	4-43
vwAttachment.setAttachmentName(...)	4-44
vwAttachment.setType(...)	4-45
vwAttachment.setLibraryType(...)	4-46
vwAttachment.setLibraryName(...)	4-47
vwAttachment.setId(...)	4-48
vwAttachment.setVersion(...)	4-49
Sample code to set parameter values	4-50
Sample code to set VWParticipants value	4-51
Sample code to set VWAttachment value	4-52
Sample code to set response parameter value	4-53
Demonstrations	4-54
Activities	4-55
Lesson 4.4. Automatically launch a workflow	4-57
Lesson: Automatically launch a workflow	4-58
Activities that you need to complete	4-59
Workflow subscription	4-60
Steps to create a workflow subscription	4-61
Select the target and define the conditions	4-62
Map workflow data fields	4-63
Entry templates	4-64

Entry Template Designer wizard . . . . .	4-65
Steps to use a document entry template . . . . .	4-66
Demonstrations . . . . .	4-67
Activities . . . . .	4-68
<b>Unit 5. Find Work . . . . .</b>	<b>5-1</b>
Unit lessons . . . . .	5-2
Lesson 5.1. Query a roster . . . . .	5-3
Lesson: Query a roster . . . . .	5-4
Activities that you need to complete . . . . .	5-5
Workflow rosters . . . . .	5-6
Work objects . . . . .	5-7
Steps to retrieve roster work items (1) . . . . .	5-9
Steps to retrieve roster work items (2) . . . . .	5-10
vwSession.getRoster(...) . . . . .	5-11
vwRoster.fetchCount() . . . . .	5-12
vwRoster.createQuery(...) . . . . .	5-13
vwRosterQuery.next() . . . . .	5-15
vwRosterElement.getWorkflowNumber() . . . . .	5-16
vwRosterElement.getWorkObjectNumber() . . . . .	5-17
vwRosterElement.getFieldValue(...) . . . . .	5-18
Sample code to retrieve roster items . . . . .	5-19
Sample code to display roster work items . . . . .	5-20
Demonstrations . . . . .	5-21
Activities . . . . .	5-23
Lesson 5.2. Query a queue . . . . .	5-25
Lesson: Query a queue . . . . .	5-26
Activities that you need to complete . . . . .	5-27
Steps to retrieve queue names in a given region . . . . .	5-28
Steps to retrieve queue elements (1) . . . . .	5-29
Steps to retrieve queue elements (2) . . . . .	5-30
Queue methods similar to roster methods . . . . .	5-31
vwSession.fetchQueueNames() . . . . .	5-32
vwQueue.getIsConnectorQueue() . . . . .	5-33
vwQueue.fetchCount() . . . . .	5-34
vwQueue.createQuery(...) . . . . .	5-35
vwQueueQuery.fetchCount() . . . . .	5-37
vwQueueElement.getWorkflowName() . . . . .	5-38
Sample code to retrieve queues . . . . .	5-39
Sample code to query a queue . . . . .	5-40
Sample code to display queue items . . . . .	5-41
Demonstrations . . . . .	5-42
Activities . . . . .	5-43
Lesson 5.3. Query an event log . . . . .	5-45
Lesson: Query an event log . . . . .	5-46
Activities that you need to complete . . . . .	5-47
Steps to retrieve log elements (1) . . . . .	5-48
Steps to retrieve log elements (2) . . . . .	5-49

vwSession.fetchEventLog(...)	5-50
vwLog.startQuery(...)	5-51
vwLogQuery.fetchCount()	5-52
vwLogElement.getEventType()	5-53
vwLogElement.getFieldValue(...)	5-55
vwLoggingOptionType.getLocalizedString(...)	5-56
Sample code to query the event log	5-57
Sample code to retrieve event log elements	5-58
Demonstrations	5-59
Activities	5-60
<b>Unit 6. Process Work</b>	<b>6-1</b>
Unit lessons	6-2
Lesson 6.1. Retrieve a step element	6-3
Lesson: Retrieve a step element	6-4
Activities that you need to complete	6-5
Steps to retrieve step element	6-6
Inbox and Inbox(0)	6-7
vwQueue.createQuery(...)	6-8
Sample code to retrieve a step element	6-9
Demonstrations	6-10
Activities	6-11
Lesson 6.2. Retrieve parameter values for a step element	6-13
Lesson: Retrieve parameter values for a step element	6-14
Activities that you need to complete	6-15
Steps to retrieve queue elements	6-16
vwStepElement.getParameters(...)	6-17
vwStepElement.getStepName()	6-19
vwParameter.getMode()	6-20
VWFieldType.getLocalizedString(...)	6-21
VWModeType.getLocalizedString()	6-22
vwStepElement.getStepResponses()	6-23
Sample code to retrieve parameter values	6-24
Sample code to retrieve step element responses	6-25
Activities	6-26
Lesson 6.3. Set parameter values for a step element	6-27
Lesson: Set parameter values for a step element	6-28
Activities that you need to complete	6-29
Steps to retrieve queue elements (1)	6-30
Steps to retrieve queue elements (2)	6-31
Steps to set VWParticipant	6-32
Steps to set VWAttachment (1)	6-33
Steps to set VWAttachment (2)	6-34
vwStepElement.doLock(...)	6-35
vwParameter.isArray()	6-36
vwStepElement.setParameterValue(...)	6-37
vwParticipant.setParticipantName(...)	6-38
vwAttachment.setType(...)	6-39

vwStepElement.setSelectedResponse(...)	6-41
Sample code to set parameters values	6-42
Sample code to set VWParticipant	6-43
Sample code to set VWAttachment	6-44
Sample code to set response parameter value	6-45
Activities	6-46
Lesson 6.4. Complete a work item	6-47
Lesson: Complete a work item	6-48
Activities that you need to complete	6-49
Steps to get processing options of a step element	6-50
vwStepElement.getCanReassign()	6-51
vwStepElement.doReassign(...)	6-52
vwStepElement.getCanReturnToSource()	6-53
vwStepElement.doReturnToSource()	6-54
Sample code to get step element processing options	6-55
Steps to complete a work item	6-56
vwStepElement.doSave(...)	6-57
vwStepElement.doAbort()	6-58
vwStepElement.doDispatch()	6-59
Sample code to complete a work item	6-60
Demonstrations	6-61
Activities	6-62
<b>Unit 7. Retrieve Work Status</b>	<b>7-1</b>
Unit lessons	7-2
Lesson 7.1. Retrieve workflow history	7-3
Lesson: Retrieve workflow history	7-4
Activities that you need to complete	7-5
Steps to retrieve workflow history (Flow)	7-6
Steps to retrieve workflow history (1)	7-7
Steps to retrieve workflow history (2)	7-8
Workflow history information	7-9
Java API methods calling sequence	7-10
vwWorkObject.fetchProcess()	7-11
vwSession.fetchProcess(...)	7-12
vwProcess.fetchWorkflowDefinition(...)	7-13
vwWorkflowDefinition.getMaps()	7-14
vwMapDefinition.getMapId()	7-15
vwWorkflowHistory.next()	7-16
vwStepHistory.next()	7-17
vwStepOccurrenceHistory.next()	7-18
vwStepWorkObjectHistory.next()	7-19
vwParticipantHistory.getUserName()	7-20
Sample code to retrieve workflow history (1)	7-21
Sample code to retrieve workflow history (2)	7-22
Sample code to retrieve workflow history (3)	7-23
Sample code to retrieve workflow history (4)	7-24
Demonstrations	7-25

Activities .....	7-27
Lesson 7.2. Retrieve milestones .....	7-29
Lesson: Retrieve milestones .....	7-30
Activities that you need to complete .....	7-31
Steps to display milestone history information .....	7-32
vwProcess.fetchReachedWorkflowMilestones(...) .....	7-33
vwWorkflowMilestones.next() .....	7-34
vwMilestoneElement.getMessage() .....	7-35
Sample code to retrieve milestone information .....	7-36
Demonstrations .....	7-37
Activities .....	7-38
<b>Unit 8. Work with Component Integrator .....</b>	<b>8-1</b>
Unit lessons .....	8-2
Lesson 8.1. Component integration concepts .....	8-3
Lesson: Component integration concepts .....	8-4
Activities that you need to complete .....	8-5
About Component Integrator .....	8-6
Purposes for component integration .....	8-8
Components Behavior .....	8-9
Component Integrator architecture .....	8-11
Components and the isolated region .....	8-12
Types of components .....	8-14
Content Extended operations (CE_Operations) .....	8-16
Steps to use CE_Operations in a workflow .....	8-17
Demonstrations .....	8-18
Activities .....	8-19
Lesson 8.2. Create and configure a Component Manager .....	8-21
Lesson: Create and configure a Component Manager .....	8-22
Activities that you need to complete .....	8-23
About Component Manager .....	8-24
Reasons for multiple Component Managers .....	8-25
How to create a new Component Manager .....	8-26
Set a connection point for a Component Manager .....	8-27
Set component queues .....	8-28
Set Component Manager library paths .....	8-29
Start and stop components .....	8-31
Demonstrations .....	8-32
Activities .....	8-34
Lesson 8.3. Configure a Java component queue .....	8-35
Lesson: Configure a Java component queue .....	8-36
Activities that you need to complete .....	8-37
About Java components .....	8-38
Developing Java components .....	8-39
JAAS-based authentication model .....	8-40
What is a LoginContext? .....	8-41
CELoginModule .....	8-42
CELogin context .....	8-43

Steps to create a LoginContext . . . . .	8-44
Sample code to retrieve VWSession . . . . .	8-45
Sample code to access Content Engine objects . . . . .	8-46
Deploying Java Components . . . . .	8-47
How to create a Java component queue . . . . .	8-48
Configure the Java component adaptor . . . . .	8-49
Import component queue operations . . . . .	8-50
Demonstrations . . . . .	8-52
Activities . . . . .	8-54
Lesson 8.4. Configure component queues for JMS . . . . .	8-55
Appendix: Configure component queues for JMS . . . . .	8-56
JMS component adaptor . . . . .	8-57
How to create a JMS component queue . . . . .	8-59
Configure general queue properties . . . . .	8-60
Configure the JMS component . . . . .	8-61
Set adaptor properties . . . . .	8-62
Assign JAAS credentials . . . . .	8-63
Define component queue operations . . . . .	8-64
Define component queue operations window . . . . .	8-65
Confirm access to JMS queue . . . . .	8-66
<b>Unit 9. Use Roles and Workbaskets . . . . .</b>	<b>9-1</b>
Unit lessons . . . . .	9-2
Lesson 9.1. Retrieve application spaces . . . . .	9-3
Lesson: Retrieve application spaces . . . . .	9-4
Activities that you need to complete . . . . .	9-5
Application spaces . . . . .	9-6
Application space and roles . . . . .	9-7
Create an application space . . . . .	9-8
Configure roles for an application space . . . . .	9-10
Steps to retrieve application spaces . . . . .	9-11
vwSession.fetchSystemConfiguration() . . . . .	9-12
vwSystemConfiguration.getApplicationSpaceDefinitions() . . . . .	9-13
vwApplicationSpaceDefinition.getName() . . . . .	9-14
Sample code to get application spaces . . . . .	9-15
Demonstrations . . . . .	9-16
Activities . . . . .	9-17
Lesson 9.2. Retrieve roles . . . . .	9-19
Lesson: Retrieve roles . . . . .	9-20
Activities that you need to complete . . . . .	9-21
Roles, in-baskets, filters, and queues relationship . . . . .	9-22
Creating roles at design time . . . . .	9-23
How roles work at run time . . . . .	9-25
Assign LDAP users and groups . . . . .	9-26
Associate role with in-baskets . . . . .	9-27
VWRole object . . . . .	9-28
Steps to retrieve all roles in an application space . . . . .	9-30
Steps to retrieve roles for a given user . . . . .	9-31

vwApplicationSpaceDefinition.getRoleDefinitions()	9-32
vwApplicationSpaceDefinition.getRoleDefinition()	9-33
vwSession.fetchMyRoles(...)	9-34
vwSession.fetchMyRole(...)	9-35
vwRole.getName()	9-36
vwRole.getAuthoredName()	9-37
Sample code to retrieve all roles in an application space	9-38
Sample code to retrieve roles for a given user	9-39
Demonstrations	9-40
Activities	9-41
Lesson 9.3. Retrieve work baskets	9-43
Lesson: Retrieve work baskets	9-44
Activities that you need to complete	9-45
VWWorkbasket object	9-46
In-baskets	9-47
In-basket widget	9-49
In-baskets tab in Process Designer	9-50
Specify reference to work queue	9-51
In-basket component: displayable columns	9-52
In-basket component: runtime filters	9-53
In-basket component: content filter	9-54
Steps to retrieve work baskets for a role	9-55
vwRole.getWorkBasketReferences()	9-56
vwQueue.fetchWorkBaskets()	9-57
Sample code to retrieve work baskets from a role	9-58
Sample code to retrieve work baskets from a queue	9-59
Steps to retrieve the work basket columns	9-60
vwWorkbasket.getColumns()	9-61
vwColumn.getName()	9-62
vwColumn.getPrompt()	9-63
Sample code to get work basket columns	9-64
VWWorkBasket.Filter object	9-65
vwWorkBasket.getFilters()	9-66
vwFilter.getName()	9-67
vwFilter.getOperator()	9-68
Sample code to get work basket filters	9-69
Demonstrations	9-70
Activities	9-72
Lesson 9.4. Query work items from work baskets	9-73
Lesson: Query work items from work baskets	9-74
Activities that you need to complete	9-75
Performing an in-basket query	9-76
Example of an in-basket query	9-77
Putting it all together - The database query	9-78
vwQueue.fetchWorkBasket(...)	9-79
vwWorkBasket.fetchNextBatch(...)	9-80
vwWorkBasket.QueryResults.getWorkObjects()	9-81
vwWorkBasket.QueryResults.getLastRecord()	9-82

Sample code for work basket query . . . . .	9-83
Sample code to display queue elements . . . . .	9-84
Sample code to display column name and value . . . . .	9-85
Demonstrations . . . . .	9-86
Activities . . . . .	9-87
<b>Unit 10. Configure Email Notification . . . . .</b>	<b>10-1</b>
Unit lessons . . . . .	10-2
Lesson 10.1. Configure email notification . . . . .	10-3
Lesson: Configure email notification . . . . .	10-4
Activities that you need to complete . . . . .	10-5
Email notifications . . . . .	10-6
Steps to configure email notification . . . . .	10-7
Configure event logging options . . . . .	10-8
Enable notification on VWService . . . . .	10-9
Configure user preferences . . . . .	10-10
Configure Process Task Manager . . . . .	10-12
Deadlines and reminders (1) . . . . .	10-14
Deadlines and reminders (2) . . . . .	10-16
Error opening Step Processor using email . . . . .	10-17
Demonstrations . . . . .	10-18
Activities . . . . .	10-19
Lesson 10.2. Customize email notification templates . . . . .	10-21
Lesson: Customize email notification templates . . . . .	10-22
Activities that you need to complete . . . . .	10-23
Default email notification templates . . . . .	10-24
Location of email notification templates . . . . .	10-25
Email template files . . . . .	10-26
Email notification types . . . . .	10-28
Steps to customize templates . . . . .	10-29
Update the custom templates . . . . .	10-30
Email notification template contents . . . . .	10-31
Optional email notification variables . . . . .	10-33
Custom new step notification . . . . .	10-34
Demonstrations . . . . .	10-35
Activities . . . . .	10-36
